

Mail and Hosting solution

How can I handle hundreds of domains? How can I manage all the mail accounts, keep viruses and spam at bay with limited resources? These are everyday challenges for a hosting provider, and at Web2Mil we have the solution for you.

With over 10 years experience hosting the highest traffic websites in Uruguay, we can deliver a complete solution for web hosting and mail account administration ideal for small and middle sized ISP's.

Completely Open Source, our solution will give you the flexibility, security and scalability needed to handle all the tasks of an ISP comfortably. Based on a centralized LDAP directory, the solution includes a web based interface for the administrators and clients.
